

**Tracking** means determining the current location, and

**tracing** means determining past locations of an item being delivered, generally using barcodes or RFID technology.

Thus, tracing means following the footsteps or a continuous line of something with the goal of finding the route (the journey), whereas tracking means finding a spot here and there where intermittent tracks have been left with the goal of finding the item or animal (the destination).

a **HAZARD** is anything that may cause harm, such as chemicals, electricity, working from ladders

the **RISK** is the frequency, high or low, that somebody could be harmed by these and other hazards, together with an indication of how serious the harm could be

a **NEAR MISS** [ mancato incidente /infortunio] is an unplanned event that has the potential to cause, but does not actually result in human injury, environmental or equipment damage, or an interruption to normal operation

record keeping [TENUTA DEI REGISTRI]

to conduct a self-assessment AGAINST the Standard

warning signs

Personal Protective Clothing/Equipment [DPI]

Hairnet – goggles – gloves – safety footwear – overall - coat

waste disposal [smaltimento rifiuti]

ON the FARM [in azienda]

Withdrawal / recall from the marketplace [ritiro/riciamo dal mk]

Products placed on the market [prodotti immessi sul mk]
